

WHEN DESIGN MEETS FUNCTION

'Interiors By Darren James' teams with 'Brisbane Appliance Sales' to create a visually stunning & functional family space.

This project clearly demonstrates what is possible when unique and creative design techniques are paired with premium quality appliances. The result is a visually stunning kitchen reflecting clever utilisation of a narrow space while perfectly suited to the owners' needs and strong demands for quality in every detail.

The scullery is hidden behind a strategically placed Miele feature wall combining cleverly hidden storage and housing a large Liebherr Fridge/Freezer. Surrounded by LED strip lighting and finished with black glass; within the feature wall, the Miele 60cm Wall Oven, Combination Steam Oven and Coffee Machine sit neatly atop two Miele Warming Drawers to enhance the cutting edge look whilst providing all the functional requirements of the clients' healthy cooking style.

A number of work zones within the kitchen ensure the space operates efficiently; the cooking zone includes a Miele induction cooktop for exceptional cooking whilst the Neff rangehood is cleverly concealed in the piano finish 'Ebony Maccassar' veneer. The sink area consists of a large 'professional series' Oliveri sink and water efficient KWC Inox vegie-spray mixer ensuring even bulky items are easy to clean. A Zip Hydrotap is incorporated above the fully integrated Miele Dishwasher; the cabinetry remains seamless as the dishwasher is unnoticeable.

A stunning island bench with marble stone inlay creates a gorgeous showpiece, whilst open shelves either side of the island house a collection of frequently used cookbooks; above, the custom stainless steel light completes this 'home chef' style kitchen with function and style.
