

INTERIORS BY DARREN JAMES

## THE KITCHEN CONNOISSEURS

HARMONISING STYLE AND FUNCTION

The owners of the featured kitchen engaged Interiors By Darren James to create a contemporary, stylish kitchen that would blend with and complement their home's architectural elements, and the result is both practical and utterly striking.

As a young couple who enjoy spending time in the kitchen preparing meals together, it was important the design not only looked fantastic, but also accommodated their love of cooking.

Carefully planned dual-preparation areas ensure that the clients have plenty of room to work alongside one another, without impeding on each other's personal space. Each area includes a custom-made butcher's block, which is housed behind the marble fascia drawer front.

Two concealed pop-up utility stations feature custom-made stainless steel inserts to store knives, spices and oils, while a separate dry area for cooking items and another for wet preparation ensures the kitchen will continue to impress for years to come.

Situated on the rolling hills of the beautiful Samford Valley, this stunning outlook inspired much of the kitchen's colour palette and finishes. An eclectic mix of colours and textures has been incorporated into this design, with Corian 'Earth' mitred benchtops and angled marble cladding on the peninsula, which softens and lightens the heaviness of such a prominent feature.

The solid cedar timber stack panels stained in half-walnut echoes the natural textures used throughout the design and creates a warm and inviting space for the adjoining office nook.

Custom-made stainless steel and cedar shelves also complement the semi-commercial feel of the kitchen, while the splashback and large open pantry feature 'Avocado' green tiles, which bring a bold splash of colour to the otherwise neutral colour palette.

Based in Brisbane, the company specialises in the design, manufacture, installation and project management of the highest-quality kitchens, bathrooms and interiors.
